

Date: 28 January 2016
No. : 2016-2665

To whom it may concern,

I have the pleasure to inform that Czech Association of Inventors and Innovators with the presidency of Mr. Lukas ZMESKAL has been an active full member of International Federation of Inventors' Associations (IFIA).

Mr. ZMESKAL has greatly assisted toward the promotion of the culture of invention and innovation in Czech Republic through his serious engagement in IFIA activities such as participation in International Invention Exhibitions, seminars, congresses, workshops as well as IFIA meetings.

Mr. ZMESKAL has also played a major role in the organization of Invent Arena to display technological innovations and raise awareness regarding the innovation among the youth and students.

So far IFIA has offered the required support to the member states that cross 120 ones, however we believe that the governmental support can have a far-reaching effect on the encouragement of innovation. IFIA is encouraged to launch Technology Transfer Office in Czech Republic with your cooperation to facilitate the access of inventors to the network of stockholders, manufacturers, investors and inventors.

IFIA annually furnishes a report of Governmental support to the United Nations. We would be glad to receive your report at the end of year to be presented in the UN.

Sincerely Yours,

Alireza RASTEGAR

IFIA President
